Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 20 and 22-24, drawn to a pressure vessel, classified in class 220, subclass 581.
- II. Claims 19 and 21, drawn to a method of manufacturing a vessel, classified in class 242, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the vessel doesn't require being made with a winding apparatus and can be wound by hand or other portion of the human body.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Thomas Bratschun on March 21, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
